## Oxos Game<sup>©</sup> Instructions

## I. Contents of the game box

40 G lozenges (4 colours)

40 L lozenges (4 colours)

Non-binding photos

## II. Aim of the game

Place the lozenges together to make the patterns provided or those straight from your imagination. Other patterns are available on our website: [www.oxosgame.com](http://www.oxosgame.com)

## III. Preparing to play

Take some time to get used to positioning the pieces. Choose a non-slippery surface to help the assembled pieces stay in place.

Make sure you have enough space where you are playing so that you don't run out of room when building your pattern.

## IV. Playing the Oxos Game©

Warning: the Oxos Game© contains small parts. An adult must be present when it is used.

There are lots of ways to play the Oxos Game©, for example:

- Individually or with several others, the player(s) assemble(s) the pieces to reproduce a predefined pattern as quickly as possible.
- The player uses his imagination to create a pattern.
- All the players write down an idea for a pattern to make with the number of pieces and put them into a hat. The players take it in turns to pull out the shape they have to make. The winner is the person who accomplishes his challenge in the shortest time possible.
- Players learn how to make the letters of the alphabet and numbers using the two lozenges.
- One player makes a pattern which he keeps hidden from the other players. He shows his pattern for a few seconds and then the rest of the players work together to reproduce the pattern from memory.
- The players are divided into two teams. One team sets a time limit and suggests a subject to make. The second team makes it. Then the teams swap roles. The winning team is the one which accomplishes the most challenges with a minimum number of pieces.
- In a game with several players, all the participants agree on a pattern to make, then take it in turns to lay down a piece.
- Taking it in turns, two players must guess what pattern is being assembled in the shortest time possible.
- Turn the Oxos Game into a balancing game. Two players or teams stack the pieces on top of each other and the loser is the one who makes them all fall down.
